

Reaumur's work will be read
Are there any ^{serving the parent itself} ~~instincts~~ which come into
play after period of propagation, connected with
death, making a place to die in - such
as cats pry into holes, because there
cannot be acquired habit ^{after} transition,
- they must be consequence of some previous
habit - Wasps killing their young in
nests at first appear so, but then
perhaps some of the old & young wasps
survive. - As neuters are sometimes
converted into Queens & then breed by
argument. ^{Against} ~~habits~~ instinct arising
from habit, is not perfect. -
are neuters of ants ever converted?

The instincts of neuters probably same
with those of females ^{of some species}, and are

165 There are in Hives Bees called corsairs i Hives (2)

179 Seed of Clover Corps almost destroyed & Apions

192 Cucumbers not injured & insect in England his murder in America

230 on antiprime outstomies - 1386 - 390

203 Cases of freign fruit in England & America injured & insect - 10 changes in Hives

203 - Hecloren destroyed & insect in America & not Pearl - selection & back on a hope Ch. 6

357 good relation (L) Hecloren with long ovipositor laying eggs in lanes in far corner

371 Female (L) got fruit takes charge of nest (but I presume is never soldier or)

374 Mother wasps, select in nest take charge of young

380 Humble Bees (2)

382 Case of season in (L) Bees

396 When insects have fed on one sort of plant with fire rather than change (2)

435 Ant-Hill & Fly (L) during same sort of trap for catching prey

439, 466 (L) Remarkable instincts 474

478 Caterpillars social (2) early stages remarkable fast

492 - Hives & wasps making Bees - from so seats while Honey - (Ant which seats itself twice in West wood

504 (L) Bees nothing particular for me in Hives
